ENDOSCOPE CLEANING BRUSHES

ROUNDED BRUSH TIP

Scrub Smarter.

ConMed's Endoscope Cleaning Brushes feature a universal design that's been created to effectively and thoroughly clean a full range of endoscope channels – helping to ensure proper cleaning. All of the brushes in this comprehensive portfolio feature a rounded brush tip to facilitate passage through the scope channel while protecting the biopsy channel from damage.

Channel Master™ Disposable Endoscope Cleaning Brushes

Our Channel Master™ series of disposable endoscope cleaning brushes feature a custom crimped shaft designed to effectively traverse tight channel bends and deflect through 90° valve port transitions. To help ensure proper cleaning of the valves, button and biopsy channels, ConMed offers a combination brush featuring a larger head of soft bristles with a convenient “No Slip” handle at one end and channel brush at the other. While the dual ended brush utilizes two brushes with one catheter pass.

Blue Bullet® Disposable Cleaning Brushes

Our complete Blue Bullet® series of disposable cleaning brushes feature blue opaque tubing, a longer working shaft and stiffer bristles to effectively clean all endoscope channels. ConMed offers a combination Blue Bullet Brush which features a 38mm head with a thumb hold handle to help ensure proper cleaning of the larger valves/channels and 13mm channel brush at the other end.

Whistle® Disposable Endoscope Cleaning Brush

Our Whistle® disposable endoscope cleaning brush features a female luer adaptor, hollow shaft and port hole for fluid injection to effectively clean channel obstacles.

Reusable Endoscope Cleaning Brushes

Our Reusable Cleaning Brushes feature a controllable ring handle and a Teflon® coated spring sheath designed for multiple uses.
